

WHAT PAST ATTENDEES HAVE SAID ABOUT LOTT

“It was a thought-provoking week. I was encouraged and inspired to think about the textile industry differently and how I can effectively implement change. We must begin to do things and think about our industry globally and how we will adapt to an ever changing environment/economy.”

“Great seminar; great material and teachings; overall, speakers were very good. I liked hearing from the speakers that had actually experienced manufacturing and textiles first hand.”

“I have gained an open look at the global market. I am going back to work and watch for the signs and signals for us to move into the right markets.”

“I have a better understanding of global competition and how it relates to the textile industry. I have learned techniques and strategies that are imperative to the survival of the textile industry in the U.S. I also have a better understanding of decisions made by my company and why those decisions were made.”

“One of the best overall seminars that I have attended during my 11-year career with Milliken.”

“This is, hands down, the best education I have received since I have been with Milliken. Other classes have been beneficial, but this has just been an outstanding class.”

“Overall, I have enjoyed this seminar. There was an objective opinion about the textile industry which helped us to understand as an individual. I appreciate that way of teaching. The Business Simulation was the best tool I have seen to demonstrate the market.”

“This was the most rewarding class I’ve attended.”

“Thanks for the opportunity to attend. Speakers were very educated and informative. Food was awesome. Each day was full of applicable tools of leadership to use in our jobs.”
